

2025 BlueTech|X Accelerator Recap Report

Powered By

In Partnership With

EXECUTIVE SUMMARY

Tampa Bay Wave's inaugural **BlueTech|X Accelerator** is an innovative new accelerator launched in 2025 that blends Wave's world-class resources from our nationally-recognized programs with industry-specific expertise and strategic connections to support the growth of an emerging technology sector for the Tampa Bay region: the Ocean Economy.

Six (6) exceptional startups were selected for this first cohort; collectively they have already raised nearly \$10M in funding and are generating over \$4M in revenue annually. Their innovative technologies aim to improve ocean health, enhance resource management in the maritime and relevant applications, and strengthen coastal community resilience. Through the program, we connected startups with strategic partners and advisors from various industries including marine transportation, logistics, control systems, energy, tourism, software development, as well as leaders from non-governmental organizations and the military.

The 2025 BlueTech|X Accelerator was made possible, thanks to a \$14 million four-year federal grant awarded by the **U.S. Department of Commerce** and the **National Oceanic and Atmospheric Administration (NOAA)**. This grant was awarded to a collaborative partnership, called The Continuum, of which Tampa Bay Wave was one of seven partner organizations that span across Florida and the U.S with the goal to provide comprehensive support to these emerging technology companies with a broad spectrum of year-round programs along with industry expertise, strategic connections, mentorship, and access to private investment capital.

Collectively, well over 100 hours of mentoring and other support were provided to this year's cohort companies from Wave's Mentor Network as well as Wave's new BlueTech|X Advisory Council, a carefully chosen group of sector-specific advisors, each playing a vital role in the Ocean Economy. Tours of several maritime facilities were incorporated into the curriculum, as well as sessions with University of South Florida's Marine Sciences researchers and the Duke Energy head meteorologist.

In all, the 2025 BlueTech|X Accelerator was a resounding success! Wave is grateful to all those who helped make it so successful, and we look forward to providing updates on these startup companies as they progress. We also look forward to hosting BlueTech|X again in 2026, strengthening Tampa Bay's reputation for maritime-related technology and building a stronger, more-resilient innovation-driven economy in Florida and across the U.S. for years to come.

Linda Olson
CEO, Tampa Bay Wave

Thank you, NOAA!

In December 2024, the U.S. Department of Commerce and the National Oceanic and Atmospheric Administration (“NOAA”) awarded a \$14 million federal grant to The Continuum, a partnership of seven (7) organizations, including Tampa Bay Wave (the prime/fiscal agent).

The Continuum represents a network of accelerators, economic development organizations, academic institutions and professional industry and ocean networks who will use this funding to run a total of twelve (12) accelerator cohorts supporting innovative tech startups in the ocean enterprise industry, with four (4) of those cohorts being run by Tampa Bay Wave’s under our new BlueTech|X Accelerator.

Tampa Bay Wave is extremely grateful to the U.S. Department of Commerce and NOAA for this generous support, as well as for their leadership in supporting emerging technologies and innovation-driven economic development.

Allison Barlow
Chief Executive Officer

“The BlueTech|X Accelerator is part of The Continuum’s coordinated network of ocean enterprise accelerators. This program is of particular importance in Florida, where the ocean economy contributes nearly \$40 billion to the state’s gross domestic product (GDP).

The program equipped the startups with critical insights and connections—enabling them to adapt their innovations to deliver the ocean related data and intelligence critically needed across industries.”

2025 Cohort Companies

eSkudad.

I want to thank the Tampa Bay Wave team that made this possible. It was an amazing experience and I'm deeply grateful for the knowledge share, collaboration, and support. Secondly, I'd like to give a shout out to all of the founders! You all are remarkable and exceptionally talented people with incredible insights into your businesses.

Max Echeverria -Founder & CEO

EMPEQ (Ithaca, NY)

EMPEQ is an AI-powered infrastructure intelligence company that transforms how organizations capture, verify, and manage asset and parts data. With a single photo, our platform identifies equipment and components, extracts critical metadata, and cross-references it against the world's largest curated critical equipment and parts library to deliver trusted, structured intelligence.

Founder(s): Herbert Dwyer, Derek LaClair

Website: empeq.ai

Eskudad (Tampa, FL)

Eskudad is a mobile-first data platform built for field workers who operate in areas with limited or no connectivity. Their offline-capable solution lets teams across the supply chain, collect, access, and sync data from anywhere, saving time and resources without relying on traditional communication networks.

Founder(s): Max Echeverria

2025 BlueTech|X Cohort Spotlight Companies

Michael Anderson
Co-Founder & CEO
Tampa, FL

Seagate Space, co-founded by CEO Michael Anderson and COO/President Sean Fortener, joined the 2025 BlueTech|X Accelerator to scale its revolutionary offshore launch infrastructure addressing the critical bottleneck in U.S. orbital access.

During the program, Seagate Space achieved a historic milestone by securing Approval in Principle (AIP) from American Bureau of Shipping for its Gateway-S platform—the first offshore asset in the world to receive AIP under ABS's newly published Requirements for Offshore Spaceports—and established strategic partnerships with multiple launch providers and defense contractors.

SkyTL, founded by CEO Rocio Frej Vitale, joined the 2025 BlueTech|X Accelerator to scale its AI-powered decision intelligence platform designed to predict and prevent natural disasters and environmental threats through real-time data fusion from satellites, drones, and sensors. During the program,

SkyTL won first place at the ACCIONA North America Innovation Awards for its water quality prediction pilot with Tampa Bay Water, which provides 2+ hours advance warning for turbidity, salinity, and red tide events at critical desalination infrastructure.

SkyTL is protecting coastal communities, critical infrastructure, and emergency responders across wildfire management, water security, and climate resilience applications.

Mentor & Investor Networks

Advisory Council + Mentor Network

Participating companies tapped into a network of 260+ volunteer mentors passionate about supporting early-stage startups. Some offer expertise in areas like HR, go-to-market strategies, or trademark law, while others provide ongoing CEO coaching. Various programming is designed to facilitate mentor introductions and relationship building between the startups and mentors. On average each participating startup gained 20–30 direct connections and received 100+ hours of hands-on guidance.

Investor Network & Demo Day

Startups in the 2025 BlueTech|X Accelerator tapped into Tampa Bay Wave's national network of 600+ investors through a high-touch, curated matching process. Rather than blanket outreach, Wave's investor team reviewed each investor's thesis and made targeted introductions based on fit, an approach made possible by the cohort's focused size of six companies.

Wave continues to expand its investor reach in key markets like NYC, Austin, and San Francisco while providing hands-on support with investor readiness and non-dilutive funding through SBIR/STTR programs. With portfolio companies surpassing \$1.6B raised, Wave ranks among the top five nonprofit startup accelerators nationwide.

2025 BlueTech|X Accelerator Partners - The Continuum

Tampa Bay Wave is a proud member of **The Continuum**, a partnership of seven (7) accelerators, economic development organizations, academic institutions and professional industry and ocean networks who also includes: Seaworthy Collective, St. Pete Innovation District, Braid Theory, the University of South Florida, Ocean Exchange (recently merged with Marine Technology Society), and World Ocean Council.

Mentor & Community Partner Networks

Founders coming through Wave programs talk extensively about the connections they made by being in our Accelerators. Below are some examples of the networks they meet.

Wave's Mentor Network

Wave member companies have access to a wide network of professionals in our 260+ all volunteer Mentor network. These professionals have a passion for helping early stage startups. Some offer their expertise on specific topics (such as HR or trademark laws), while others may coach a startup on an ongoing basis, depending on what support the founder(s) need. We host regular Mentor mixers to build strong trusted relationships. Startups receive at least 20-30 direct mentor connections during their time in the program resulting in easily 100+ hours of consulting help.

Here is the [link](#) to the page on Wave's website, showcasing our Mentor network.

Wave's Community Partner Network

Wave has also built a strong community partner network, with both formal and informal agreements in place. We connect our member companies to a wide range of community partners, such as our economic development partners and others who can help our startups build their base in our community.

We also provide introductions to others ESO (entrepreneur support organizations) in the ecosystem to encourage their participation and to magnify their visibility and exposure. Logos from several of our community partners are shown below but more may be found under this [link](#) on our website.
