TAMPA BAY wave

2026 Tech|X Accelerator

Recap Report

Powered by

Nielsen Foundation

EXECUTIVE SUMMARY

The 2026 TechX Accelerator represented the ninth year of success, thanks to the unwavering support of The Nielsen Foundation's commitment to ensuring unbiased opportunities are available to talented tech founders from across industry verticals. As a nonprofit 501(c)(3), Tampa Bay Wave does not take any equity from participating companies, thus the impact of this year's accelerator program, along with the programs in the prior eight years, would not be possible without the critical support of The Nielsen Foundation. We are very grateful for this support and happy to share the impressive impact metrics and examples in this report.

The 2026 cohort consisted of 15 tech startups recruited from across the US and beyond, selected from 138 applicants, many referred by Wave's ecosystem network members, including alumni companies.

The highly-credentialed startups selected for this year's 2026 cohort participated in an intensive multi-week program that included dedicated mentors, one-on-one coaching with notable tech founders, sales and pitch coaching, and investor introductions, all in an environment designed to support high-scale growth. The companies also benefit from ongoing support through Tampa Bay Wave's connections and access to further accelerate their development.

These companies received over 500 hours of mentoring and other support during the program, as well as invaluable exposure through press, social media, and Wave's signature events. The Welcome Reception was hosted at Lions Eye Institute, and the Pitch Night was held at Feeding Tampa Bay, two amazing community service organizations in their own rights. Andrea Bertels, President and Executive Director of Grantmaking of The Nielsen Foundation, graciously opened remarks via video, followed by a short video provided by Greg Celestan, from Celestar.

Included herein are highlights from the 2026 TechX program, as well as updates about alumni companies from prior years, so that The Nielsen Foundation can celebrate success with us. We have provided an aggregated recap of metrics dating back to the inaugural 2018 program, noting that the 126 startups that have been supported to-date are far outperforming our benchmark comparative. They've created 1,890 jobs, attracted $504 million investor capital, achieved $124 million in new revenue, and demonstrated what founders solving real-world issues through transformative technology can accomplish.

On behalf of all of us at Tampa Bay Wave, we are so grateful to The Nielsen Foundation for making the 2026 Tech|X Accelerator another success, and for the combined impact that your investment in Wave's mission delivery has had for the participating founders and for the recipients and users of the technologies they introduced to the market over the last nine years.

Linda Olson
CEO, Tampa Bay Wave

Thank you to our Tech|X Accelerator Named Sponsor

Tampa Bay Wave ("Wave"), a 501(c)(3) nonprofit technology accelerator, expresses sincere gratitude to The Nielsen Foundation for the generous and long-term sponsorship of the 2026 Tech|X Accelerator. This critical support enables Tampa Bay Wave to continue our mission of fostering cutting-edge startups for all and driving the growth of Florida's innovation economy!

Nielsen Foundation

Tampa Bay Wave is honored to be a Nielsen Foundation Signature Program awardee. We value our long collaboration as a strategic partner to deliver on the Foundation's commitment to support efforts that leverage data and technology enabling social impact.

This year's TechX Accelerator was featured in the Tampa Bay Business & Wealth magazine article entitled "Tampa Bay Wave unveils 15 startups selected for latest tech accelerator cohort."

Nielsen Foundation

Andrea Bertels

President and Executive Director of Grantmaking

"At the Nielsen Foundation, we have proudly supported the TechX Accelerator for nine years as part of our mission to power and advance more inclusive innovation in the media and technology industries. Seeing this cohort come together to solve complex real world challenges through technology is exactly the kind of innovation that we hope to support."

Nine Years of Impact & Success

Our nine-year partnership with The Nielsen Foundation has been instrumental in advancing inclusion within the tech ecosystem, providing tailored mentorship to founders driving innovation in sectors like fintech and healthcare. This sustained support has consistently catalyzed growth, resulting in a surge of high-caliber applicants and heightened engagement from the investment community.

Looking back to 2025, our first eight cohorts—comprising 111 startups—had collectively raised nearly $400 million and created 1,600 jobs. These companies outperformed their peers in similar accelerators, raising nearly $2 million more in funding on average and creating approximately 5 additional jobs within a year of program completion. When benchmarked against national zero-equity programs, our Tech|X Accelerator startups demonstrated significant outperformance, raising an average of $3+ million more in funding and creating 9 additional jobs.

As of July 2026, those numbers have climbed further. Across 9 years and 126 supported startups, aggregate results now include $504 million in private capital investments, including $24 million in SBIR/STTR funding, 1,890 jobs created, and $124 million in reported revenue. On a per-startup basis, this equates to just under $4 million raised, 14.7 jobs created, and an average revenue of just under $1 million.

Comparative Averages as of 2026:	
Tampa Bay Wave Tech|X (years 1-9)	***Other Leading Program***
*Per Company Raised: $*3.9 Million *Per Company Jobs: 14.7*	*Per Company Raised: $668,604* *Per Company Jobs: 4*

The efficacy of our model is clearest when **comparing the trajectories of Tech|X founders against their baseline stats upon entry: we have achieved 3.7x capital growth (a 270% increase), added more than 14 new jobs per company, and realized 3.4x revenue growth (a 240% increase).** These results underscore the immense value of our programs in supporting purpose-driven founders. The Nielsen Foundation's multi-year commitment remains the bedrock of this success, driving year-over-year growth in both the visibility and the competitive quality of our applicant pool.

2026 Tech|X Cohort Spotlight

Opalite Health

Dr. Cathleen Kuo MD
CEO
Palo Alto, CA

Opalite Health, co-founded by CEO Dr. Cathleen Kuo MD (who deferred an acceptance into a Neurosurgery Residency to start the company), joined the 2026 Tech|X Accelerator to scale its real-time AI medical interpretation platform, built so that language never stands between a patient and the care they need.

Delivering HIPAA-compliant interpretation across 150+ languages, Opalite has been validated against certified medical interpreters — with over 90% fewer errors, at 50% lower cost.

Shortly after the program, Opalite announced an investment from Robinhood Ventures Fund II, joining Rebel Fund, Forum Ventures, and more. As it scales, Opalite is expanding access to safe, timely care for the millions of patients with limited English proficiency.

Vetavize

Vetavize, founded by CEO Anthony Rivera — a former Navy SEAL and former Amazon — joined the 2026 Tech|X Accelerator to scale its platform helping veterans claim the federal benefits they've earned.

Using intelligent automation, Vetavize guides veterans through the VA claims process with health assessments, secure document storage, and its AI-powered HERO Report.

During the program, Anthony credited the Tampa Bay Wave team with driving key business development introductions for the company. As it scales, Vetavize aims to become the gold standard for post-military life for all veterans and their families.

CEO
Orlando, FL

Alumni Spotlight

Tukki

Ramiro Roballos
Co-founder & CEO
Buffalo, NY
2025 Tech|X

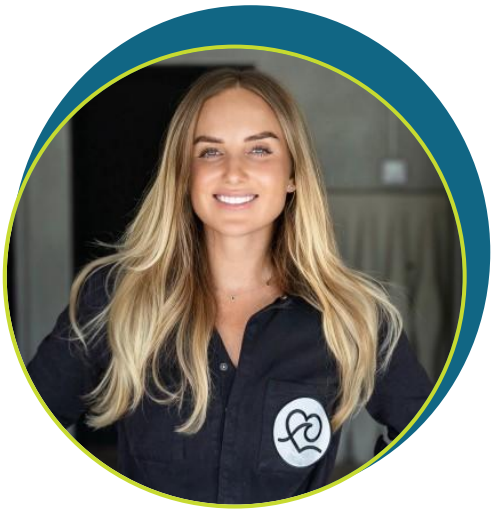

Ramiro Roballos, co-founder and CEO of Tukki, participated in the 2025 Tech|X cohort to scale the company's mission of making U.S. immigration simple. Tukki combines AI-powered technology with in-house immigration attorneys to streamline the visa and green card process in a single transparent platform.

Since completing the program, Tukki was named winner of 43North's 11th annual startup competition — standing out among 1,000+ applicants to secure a $1 million investment. The win capped a year in which Tukki tripled its revenue and grew to a team of roughly 30.

KIND DESIGNS

Anya Freeman, founder and CEO of Kind Designs, participated in the 2023 Tech|X cohort to scale a bold idea: 3D-printing "Living Seawalls" that protect shorelines from erosion and storm surge while restoring marine habitats — fabricating panels up to 20 times faster than traditional methods.

Since completing the program, Kind Designs has raised over $16.5 million and earned national recognition, including Time Magazine's "Best Inventions of 2025" and Fast Company's World Changing Ideas Awards. With installations across South Florida and beyond, the company is reimagining coastal protection for communities facing rising seas.

Mentor & Investor Networks

A Star-Studded Mentor Network delivered over 100 hours

Our startups gained unparalleled access to a powerful **network of over 300 volunteer mentors** dedicated to fueling early-stage innovation. From specialized guidance in HR, go-to-market strategy, and trademark law to transformative one-on-one CEO coaching, our structured programming fostered deep, meaningful partnerships. The impact was significant: **each participating startup secured dozens of direct connections** and leveraged over 100 hours of intensive, hands-on mentorship.

A Record-Breaking Investor Demo Day!

The 2026 Tech|X Accelerator has set a new benchmark for startup success, leveraging Tampa Bay Wave's formidable network of over 750+ investors from throughout the United States. Our **marquee Demo Day shattered previous records, attracting investors** across every funding stage and securing immediate, actionable interest for every participating startup.

Beyond this milestone, Wave's dedicated investor team is aggressively scaling its footprint in key innovation hubs—including New York City, Austin, and San Francisco—while providing founders with best-in-class, hands-on support in investor readiness and non-dilutive funding strategies like SBIR/STTR. With our **portfolio companies now surpassing a combined $2 billion in capital raised**, Tampa Bay Wave continues to cement its position as a premier national accelerator, consistently outpacing other non-profit programs in impact and growth.

2026 Tech|X Recruitment & Selection

55%
Applications Outside of FL

16%
Applications Outside of US

15
Companies Selected

The 2026 Tech|X Accelerator year-round recruitment efforts attracted another cohort of exceptional tech startups ready to scale. Tampa Bay Wave's reputation as a "best-in-class" accelerator, combined with its extensive networks, continues to help attract top-level founders seeking strategic connections and expert guidance needed for long-term success.

We also credit the success of this year's recruiting cycle to *The Nielsen Foundation* and their long-term support, which has enabled Tampa Bay Wave to build a national reputation and a strong track record for scaling purpose -led startups. Because of this long-term support and some adjustment to our application portal processes, we have seen enhanced quality applicants, along with strong applicants referred by our alumni companies.

The 2026 cohort exemplifies the exceptional talent we're attracting. The founders brought impressive backgrounds from global brands such as Amazon, Oracle, U.S. Department of Veterans Affairs, U.S. Air Force, U.S. Navy, Shell, Tulane University, Apple, Boeing, PayPal, Yelp, Wells Fargo, Cisco, Quest Diagnostics, Mastercard, Mass General Brigham, Johnson & Johnson, JPMorgan Chase, Techstars, McKinsey & Company, Bayer, NHS, HP, Johns Hopkins Medicine, and more.

Additionally, with degrees from top institutions like Harvard University, Yale University, Cornell University, Duke University, Stanford University, Massachusetts Institute of Technology (MIT), United States Air Force Academy, Wharton/University of Pennsylvania, Tulane University, Texas A&M University, Ohio State University, Northwestern University, UCLA, University of California Berkeley, University of Virginia, University of Florida, Universidad de Chile, Brandman University, University of Maryland, University of Miami, University of Oxford, University of Cambridge, Boston College, Imperial College London, University of Delaware, University at Buffalo, Emory University , further demonstrating the value of Tampa Bay Wave's growing network of academic partnerships.

Mentor & Community Partner Networks

Founders coming through Wave programs talk extensively about the connections they made by being in our Accelerators. Below are some examples of the networks they meet.

Wave's Mentor Network

Wave member companies have access to a wide network of professionals in our 300+ all volunteer Mentor network. These professionals have a passion for helping early stage startups. Some offer their expertise on specific topics (such as HR or trademark laws), while others may coach a startup on an ongoing basis, depending on what support the founder(s) need. We host regular Mentor mixers to build strong trusted relationships. Startups receive at least 20-30 direct mentor connections during their time in the program resulting in easily 100+ hours of consulting help.

Our Mentor Network is currently showcased on our website.

Wave's Community Partner Network

Wave has also built a strong community partner network, with both formal and informal agreements in place. We connect our member companies to a wide range of community partners, such as our economic development partners and others who can help our startups build their base in our community.

We also provide introductions to others ESO (entrepreneur support organizations) in the ecosystem to encourage their participation and to magnify their visibility and exposure. Logos from several of our community partners are shown below but more may be found on our website.
